- IntelliJ
- Microsoft Visio Code
- Visual Studio
- Pycharm
-

Hardware

- Network technologies
- Hardware over clocking
- Different technological device

Experience / IT related educational practice

Learning project

Project Description:

Customer:

Involvement Duration:

Project Role:

Responsibilities:

Project Team Size:

Tools & Technologies:

Calendar

Learning project; can find it here : <https://github.com/weatris/development>

2 months

Junior Web UI Engineer

Create calendar app with such functionalities

login + register page

Calendar page (CRUD)

Make friends (can share calendar events with them)

Password recovery

1

React, Flask, PostgreSQL, Jest

Learning project	Todo CRUD app with hosting on EC2 S3
Project Description:	Crud app
Customer:	
Involvement Duration:	2 month
Project Role:	team member
Responsibilities:	Create list of tasks on frontend Create constorllers for CRUD Add database scheme Host server on EC2 Host frontend on S3
Project Team Size:	1
Tools & Technologies:	React Node js Redux toolkit PostgreSQL Ec2 S3
Learning project	Instagram Clone (In process)
Project Description:	Create a clone for Instagram
Customer:	
Involvement Duration:	2 month
Project Role:	team member
Responsibilities:	Create Forgot/Recover functionality + tests Create MediaUI Connect Login/SignUp to Server + tests Implement RememberMe functionality Generating new ideas Taking a part in conversations Working with database Created History functionality Hosting server code on ec2 instance
Project Team Size:	10
Tools & Technologies:	React (TypeScript) Node js Redux toolkit PostgreSQL Mailer EC2 S3
Languages	English Upper Intermediate (B2) Ukrainian Native Speaker
